Scope of Work

Turnkey solution is a cooperative effort between an owner, a contractor and design-build team to deliver a building project that includes all the key features and work needed to fulfil the client's brief requirements. We provide solutions that reduce peril by minimizing uncertainties during the construction phase, help control costs at the onset of construction, ensure quality workmanship, and ensure completion in a timely fashion.

We specialize in Turn key Solutions

A turnkey solution is a well-planned project management process that has been intended and built to meet specific client requirements. For instance, it could be an assembly of pre-qualified components or a bundled set of products that have been assembled, tested and certified by the vendor or otherwise made available as an integrated system.

Turnkey projects are the most efficient, cost-effective and easiest way to get a project done. Turnkey delivery methods consolidate aspects of project design, financing, procurement, subcontracts and construction into an all-in-one solution with a single point of accountability.

For one who seeks a total interior development solution, we offer turnkey projects, across several categories. Our craftsman and construction specialists can guide the project owner through all stages of the design and construction process to ensure that your project is accomplished on time and within allotted budget frame.
